

SUDFLOC 3365

aluminium chloro hydrate based flocculant

- Liquid blend for ease of dosing.
- Bulk delivery facility – eliminates drum storage and hazards.
- Synergistic blend for improved results at lowered dosages.
- Approved for use in potable waters.
- Is effective over a broad pH range.
- It is approved by the Department of Health for the treatment of potable water supplies.

description and use

SUDFLOC 3365 is a polymer blend particularly suitable for the clarification of a broad range of surface waters to potable water standards.

SUDFLOC 3365 is generally diluted into an approximate 20% stock solution.

treatment and feeding requirements

The exact dosage of **SUDFLOC 3365** will be advised by your ImproChem Water Treatment Representative for each application.

The dosage will depend on factors such as: The design of the system and the inorganic / organic particle loading. The local ImproChem sales technologist will arrange for a full system survey, and water analysis, and provide advice accordingly.

Appropriate dosing rates are influenced significantly by the particular application and jar testing is advisable ahead of final product selection & dosing rate determination.

Clearly the number of variants involved requires technical and theoretical consideration prior to the submission of any accurate costing.

general properties

Physical properties of **SUDFLOC 3365** are shown on the Safety Data Sheet, a copy of which is available on request.

packaging information

SUDFLOC 3365 is a liquid blend, available in a wide variety of customized containers and delivery methods. Contact your ImproChem representative for details.

storage and handling

Store **SUDFLOC 3365** in a cool, dry place.
